Week 2 Assignment 2: Working with Minitab Software – Descriptive Statistics

Companion to Assignment 2/Step by Step Instructions Using Minitab Software

Summary of Instructions: For this assignment you will use the data set provided on the assignment page. You will copy this data set into a spreadsheet in Minitab.

Step 1. Retrieve the Data from the Data Set Spreadsheet

Click the magnifying glass in the image of the assignment page for the Data Set. Select the first row in the spreadsheet. These are the column headings. Press and hold the ctrl key on your keyboard and press the letter C. This action copies the selected content to the clipboard of your computer.

spre

Ctr

Retrieve the Data Set for this assignment.

1	А	В	C	D	E	F	G		
1	Year	Murder/Non- Negligent Manslaughter	Forcible Rape	Robbery	Aggravated Assault				
2	2008	294	750	10603	13132				
3 2009 287		287	823	11367	13116

7						Key an	utypec		
	irst row i ess ctrl +	in the C to copy.							

Step 2. Open Minitab and Copy/Paste Column Headers

Open the Minitab software. Depending on your operating system, you may need to click or double click to start the Minitab. Click in the grey cell below cell C1. Hold down the ctrl key on the keyboard and type the letter V. This will paste the column titles from the spreadsheet into Minitab.

Display Descriptive Statistics X Variables: C1 Year C2 C3 C4 C5 Murder/Non-Nec All column headings should Year 'Murder/Non-Negligent Forcible Rape Manslaught' 'Forcible Rape' Robbery Robbery 'Aggravated Assault now be in the Variables box. Aggravated Ass By variables (optional): . • -Worksheet 1 *** ŧ C1 C2 C3 **C8** Murder/Non-Negligent Manslaught Year Forcible Rape R Select 2008 294 750 Statistics... Graphs... 1 2009 2 287 823 Help OK Cancel 3 2010 269 712 2011 198 771 4 00.14 11005 2012 5 217 665 9385 11343

After all column headings have been added to the variables list, your screen should look like this:

Step 7. Select the Statistics Button

Select the **Statistics** button. In this menu you check only the boxes for the data you want shown in your results output (Session Window). For this exercise *check the same selections that are checked in the graphic below,* then select **OK** for both menus to get your output.

Step 8. Results are displayed in the Session Window

The Session Window displays the descriptive statistics data output for your analysis

Student Response - Analysis of Data

Write your initial analysis of these violent crimes looking at the data set year by year to draw your hypothesis. Then use the output from this Minitab exercise to compare each crime using the Mean, Standard Deviation, Minimum, and Maximum data. Check your reading for the week for more information on how to apply this data in your analysis.

In addition to your written analysis support your findings by creating and recoded variables to produce a **pie chart** illustrating the variances in crimes 2008 and 2012.

Step 9. Producing a Pie Chart

📶 Minitab - Untitled	
<u> </u>	at <u>G</u> raph E <u>d</u> itor <u>T</u> ools <u>W</u> indow <u>H</u> elp Assista <u>n</u> t

Worl • 1 2	C1 Year 2008 2009	Murder/N			29 28	94 87		t		Data Options	

Step 9 B – Click C1 Year and click the Select button. This action adds Year to the Categorical variable.

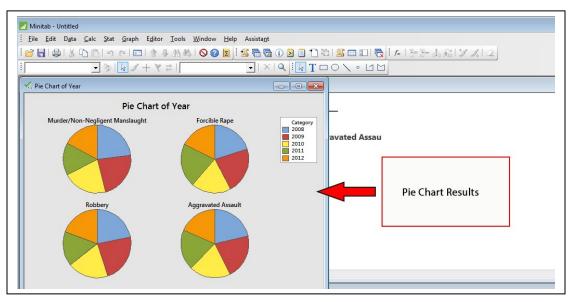

Vie Chart C1 Year C2 Murder/Non-Negliger C3 Forcible Rape C4 Robbery C5 Aggravated Assault	Chart values from a table Categorical variable: 1. Select the Year 2. Click the Select				
Select Help	Pie Options Labels	565 0 Pie Ch. C1 C2 C3 C4 C5	823.0	C Chart counts of unique values C Chart values from a table Categorical variable: Year Summary variables:	Year is populated in Categorical variable

Step 10. Add column headings to the Summary variable field

Click each column heading and click the select button to add each column heading to the Summary variable field. Click the **OK** button

Step 11. The Pie Chart results

Experiment with variables in other Graphs

The Graph menu lists many chart options. Now that you know how to find the list of Graphs, try some other types of graphs, bar chart, histogram, line plot, etc., using different variables from your table of data.
