

Cutoff Points for the Student's t Distribution

For selected probabilities, α , the table shows the values $t_{v,\alpha}$ such that $P(t_v > t_{v,\alpha}) = \alpha$, where t_v is a Student's t random variable with v degrees of freedom. For example, the probability is .10 that a Student's t random variable with 10 degrees of freedom exceeds 1.372.
