

Solve. $x - 3 = -7$

Solve. $x - 5 = 25$

Using the addition principle
Solve $15 = n - 2$. Be sure to check.

Solve using the multiplication
Principle. Be sure to check.
 $-3x = 36$

Solve. $-5x + 10 = 40$. Be sure to check.

Add: $(3x + 4) + (-4x + 8)$. Simplify the answer.

Add: $(x^3 - 1) + (x^3 + 1)$. Simplify the answer.

Add: $(9 + 7x + 5x^2 + 6x^3) + (5 - 7x + 5x^2 - 6x^3)$. Simplify
the answer.

Simplify. $-(4x - 3)$.

Subtract. $(6x + 2) - (-4x + 7)$. Simplify the
answer.
