If $B_{n}$ is the group of upper triangular invertible matrices, $O_{n}$ is the orthogonal group, $S O_{n}$ is the special orthogonal group ( $n$ means that the matrices are $n \times n)$, and $F_{p}$ is the prime field, compute the orders of the groups:
a) $B_{n}\left(F_{p}\right)$;
b) $O_{2}\left(F_{7}\right)$;
c) $O_{3}\left(F_{2}\right)$;
d) $\mathrm{SO}_{3}\left(F_{3}\right)$.
