

Question: The following is the graph of $y = f(x)$. List the largest intervals over which $f' > 0$ (f is increasing.). List the largest intervals over which $f' < 0$ (f is decreasing.) Round values to the nearest thousandth.

- a) $f' > 0$ (increasing): $(-\infty, 1.065)$, $(-5.879, \infty)$
 $f' < 0$ (decreasing): $(1.065, -5.879)$
- b) $f' > 0$ (increasing): $(-\infty, 1.065)$, $(-5.879, \infty)$
 $f' < 0$ (decreasing): $(0.131, 2.535)$
- c) $f' > 0$ (increasing): $(-\infty, 0.131)$, $(2.535, \infty)$
 $f' < 0$ (decreasing): $(0.131, 2.535)$
- d) $f' > 0$ (increasing): $(-\infty, 0.131)$, $(2.535, \infty)$
 $f' < 0$ (decreasing): $(1.065, -5.879)$

Question: Find all of the critical points for the following function $y = h(x)$. Then determine whether the function attains a relative minimum or a relative maximum at each critical point using the first derivative test.

$$h(x) = x^4 - 6x^2 - 10$$

- a) $\begin{array}{c} \nearrow \text{max} \searrow \\ \bullet \\ -\sqrt{3} \end{array} \quad \begin{array}{c} \nearrow \text{min} \searrow \\ \bullet \\ 0 \end{array} \quad \begin{array}{c} \nearrow \text{max} \searrow \\ \bullet \\ \sqrt{3} \end{array}$
- b) $\begin{array}{c} \searrow \text{min} \nearrow \\ \bullet \\ -\sqrt{3} \end{array} \quad \begin{array}{c} \searrow \text{max} \nearrow \\ \bullet \\ 0 \end{array} \quad \begin{array}{c} \searrow \text{min} \nearrow \\ \bullet \\ \sqrt{3} \end{array}$
- c) $\begin{array}{c} \searrow \text{min} \nearrow \\ \bullet \\ -\frac{\sqrt{2}}{2} \end{array} \quad \begin{array}{c} \searrow \text{max} \nearrow \\ \bullet \\ 0 \end{array} \quad \begin{array}{c} \searrow \text{min} \nearrow \\ \bullet \\ \frac{\sqrt{2}}{2} \end{array}$
- d) $\begin{array}{c} \nearrow \text{max} \searrow \\ \bullet \\ -\frac{\sqrt{2}}{2} \end{array} \quad \begin{array}{c} \nearrow \text{min} \searrow \\ \bullet \\ 0 \end{array} \quad \begin{array}{c} \nearrow \text{max} \searrow \\ \bullet \\ \frac{\sqrt{2}}{2} \end{array}$
